

Instalar wildFly

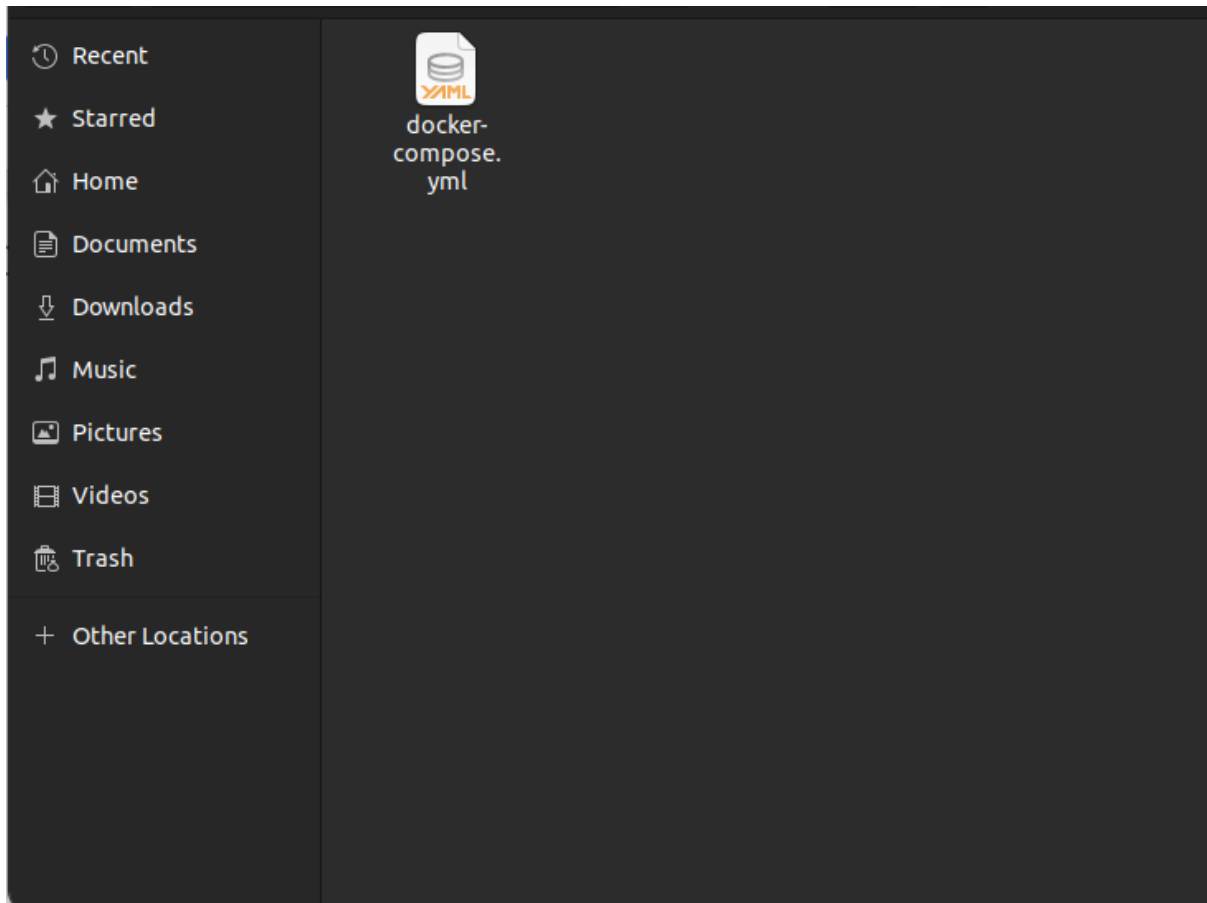

\$ curl -sSL

<https://raw.githubusercontent.com/bitnami/containers/main/bitnami/wildfly/docker-compose.yml> > docker-compose.yml

A terminal window with a dark purple background. The prompt is 'estudiante@DAW1:~/Documents/wildFly\$'. The command entered is 'curl -sSL https://raw.githubusercontent.com/bitnami/containers/main/bitnami/wildfly/docker-compose.yml > docker-compose.yml'. The prompt is repeated on the next line.

```
estudiante@DAW1:~/Documents/wildFly$ curl -sSL https://raw.githubusercontent.com/bitnami/containers/main/bitnami/wildfly/docker-compose.yml > docker-compose.yml
estudiante@DAW1:~/Documents/wildFly$
```

te descarga el archivo docker compose con el cual solo tienes que levantarlo

\$ docker-compose up -d

```
estudiante@DAW1:~/Documents/wildFly$ docker-compose up
